

**Devon & Somerset Fire & Rescue Service and Bourne Leisure Group Limited**

Bourne Leisure has an established Primary Authority partnership with Devon and Somerset Fire and Rescue Service for Fire Safety.

Bourne Leisure sought advice in relation to the evolving hospitality sector of safari tents, yurts, geo-domes, super-tents and similar structures used as a semi-permanent sleeping accommodation provision, for their Haven Holiday brand locations.

There was previously limited information in the public domain where no set criteria had been established for these accommodation types.

Working in partnership Primary Authority advice was issued to Bourne Leisure to clarify provisions within tented structures to reduce fire risk, and provide advice on the extent of fire detection and warning. This advice was then developed by the NFCC and shared as best practice.
